

AIR VELOCITY SENSOR

131 E. Brokaw Road | San Jose CA 95112 | +1 (408) 392-0989 | info@posifatech.com | www.posifatech.com

DESCRIPTION

PAV1000 was designed as an economical highperformance air velocity sensor for thermal management in even the most space constrained locations such as data center server farms. Unlike thermistor based solutions, the Posifa MEMS sensor core is minimally affected by ambient temperature changes and provides instant real time feedback on proper air flow at the server blades.

PAV1000 features Posifa's third-generation thermal flow die, benefiting from the latest innovations in microfabrication. The sensor die uses a pair of thermopiles to detect changes in temperature gradient caused by mass flow, delivering excellent signal-to-noise and repeatability. The "solid state" thermal isolation structure on the sensor die eliminates the need for surface cavity or fragile membrane used in competing technologies, making the sensor resistant to clogging and pressure shock.

The PAV1000 series is available with analog voltage output trimmed at zero and full scale and digital I2C output.

APPLICATIONS

- Data Center Thermal Management
- HVAC VAV Damper Control
- HVAC Filter Monitoring

FEATURES

- Unsurpassed performance in a robust and cost effective package
- "Solid state" sensing core (no surface cavity or fragile membrane) resistant to clogging and pressure shock
- No moving parts
- Extremely fast response times (125 ms typ)
- Excellent repeatability (1% FS)
- Compact packaging

MAXIMUM RATINGS

Operating Temperature: -25 to 85 °C

• Storage Temperature: -40 to 90 °C

• Humidity: 0 to 100% RH, non-condensing

SPECIFICATIONS

Test Conditions: Vin=5±0.01VDC, Ta=25°C. Relative Humidity: 40% <rh<60%< th=""></rh<60%<>					
SPECIFICATIONS	MIN	TYP	MAX	UNIT	CONDITIONS
PAV1005	0		7.23	m/sec	
PAV1015	0		15	m/sec	
Output Voltage (V)	0.5		4.5	VDC	
Output Count (D)	409 to 3686		Count		
Resolution		12		Bit	
Repeatability		1%		F.S.	
Accuracy		5%		F.S.	
Response Time		125		mSec	
Supply Voltage		5		VDC	
Supply Current		30		mA

TYPICAL OUTPUT CURVE

Wind Speed (m/sec)	Output (Volt)
0	0.500
1.07	1.118
2.01	1.858
3.00	2.522
3.97	3.080
4.96	3.550
5.98	3.975
6.99	4.361
7.23	4.500

ORDERING INFORMATION

PART NUMBER	SPECIFICATIONS
PAV1005V	7 m/sec, 0.5 to 4.5 V, non-linear
PAV1015V	15 m/sec, 0.5 to 4.5 V, non-linear

^{*}Please contact Posifa to place an order. Order I2C Digital Output models by specifying "D" instead of "V" in part numbers above.

CUSTOMIZATION OPTIONS

If the standard product described in this datasheet does not completely meet your needs, please contact Posifa Technologies to discuss other options. Help us understand your application and sensor requirements and we can work together to find the best overall solution.
